WIRELESS SPEED CONTROL WITH VOICE FOR WHEELCHAIR APPLICATION

ZAMRE BIN ABD GHANI

A project report submitted in fulfilment of the
requirements for the award of the degree of
Master of Engineering
(Electrical-Mechatronics and Automatic Control)

Faculty of Electrical Engineering
Universiti Teknologi Malaysia

MAY 2007

Special to my beloved wife and my family

ACKNOWLEDGEMENT

First of all, I would like to thank my supervisor, Prof. Dr. Ruzairi Bin Hj Abdul Rahim for his effort, guidance and support throughout this project. Without his advice, suggestions and guidance, the project would have not been successful.

Special thank to my employer, Universiti Teknikal Malaysia Melaka for giving me financial support to further my study here. I also want to express my appreciation to Cik Norhashimah Binti Ismail and Encik Kok Seong for their help and support through out the project.

Last but not least, thanks a lot to my wife, Haliza Binti Othman, my parents and friends who have helped me a lot to assure this project run smoothly and successfully.
